About Pacific Utilities Corporation (PUC)

Pacific Utilities Corporation (PUC) is a fictional provincial Crown corporation responsible for delivering critical utility services across British Columbia

PUC operates critical infrastructure supported by enterprise IT and operational technology environments serving residential, commercial, industrial, and public-sector customers

The organization has approximately 6,500 employees across corporate offices, regional operations, engineering, technology, and field operations

Note: PUC is a fictional organization created for educational and portfolio purposes

Cybersecurity GRC Roadmap

The roadmap below summarizes the frameworks applied and artifacts developed across eight interconnected projects.

Project	Frameworks & Standards	Key Artifacts
1 - Enterprise Cyber Risk Assessment	ISO 31000, NIST CSF 2.0	Risk Assessment & Report
2 - Risk Register & Treatment Plan	ISO 31000, NIST RMF	Risk Register & Treatment Plan, Risk Heat Map, Report
3 - Third-Party Risk Ecosystem Assessment	Shared Assessments SIG Lite, NIST SP 800-161 Rev.1	Inherent Risk Assessment, Vendor Due Diligence Assessment, Report
4 - Control Mapping & Framework Alignment	NIST CSF 2.0, ISO/IEC 27001:2022, CIS Controls v8, SOC 2 Trust Services Criteria	Control Mapping Matrix & Report

5 - Audit Coordination & Evidence Management	SOC 2 Trust Services Criteria	PBC Audit Tracker, Report
6 - Business Impact Analysis	NIST SP 800-34, BCI Good Practice Guidelines	BIA, Stakeholder Workshop Summary, Report
7 - AI Governance Assessment	ISO/IEC 42001, NIST AI RMF, EU AI Act	AI Risk & Impact Assessment, AI Acceptable Use Standard, Report
8 - Executive Cyber Risk Report		Report
